

ARCHITECTURAL

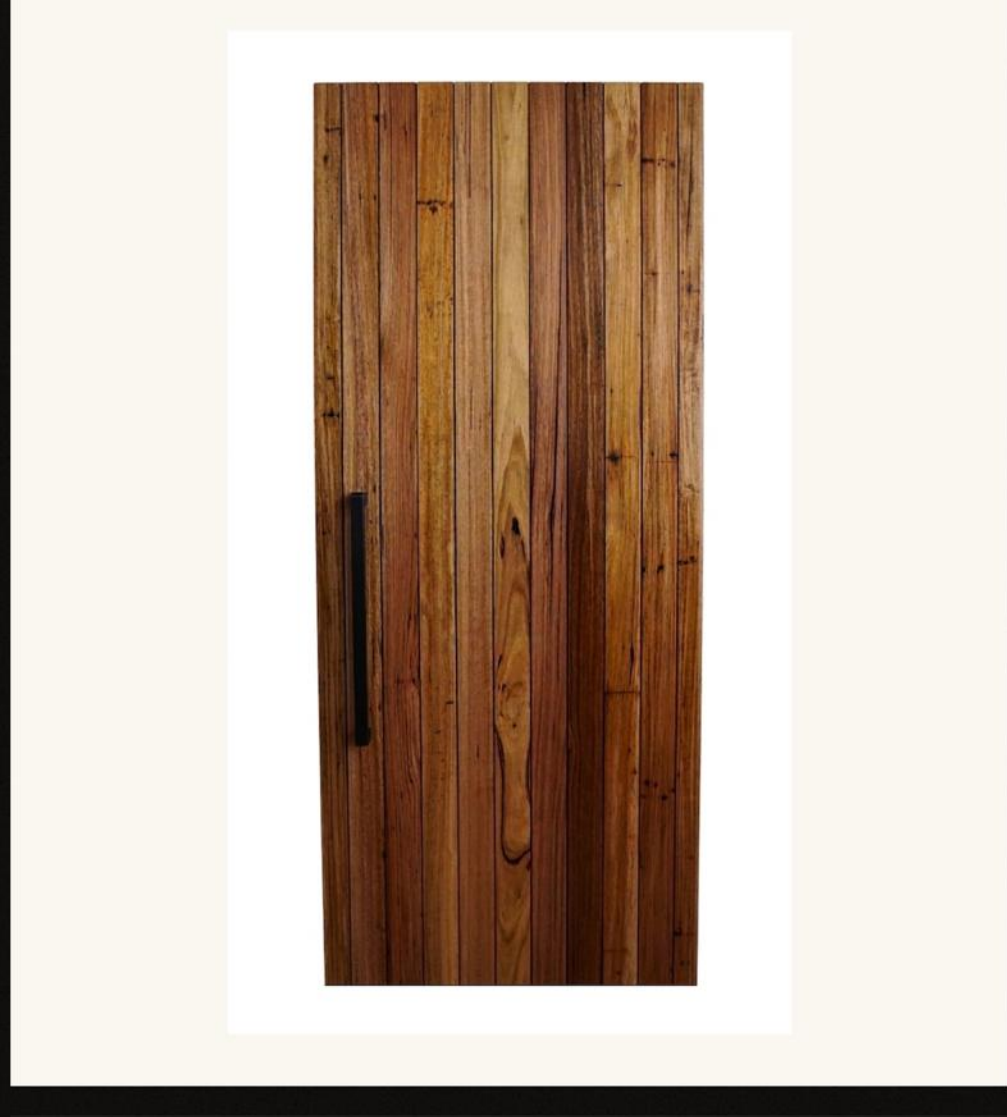

# Custom Timber Doors

Designed, engineered, and built in Moorabbin.

**From \$1,948 supply**

Six designs · Five timber species · Available as hinge or pivot  
Standard or custom sizes · Manufactured at the Bespoke Doors workshop in Moorabbin

THE ARCHITECTURAL RANGE

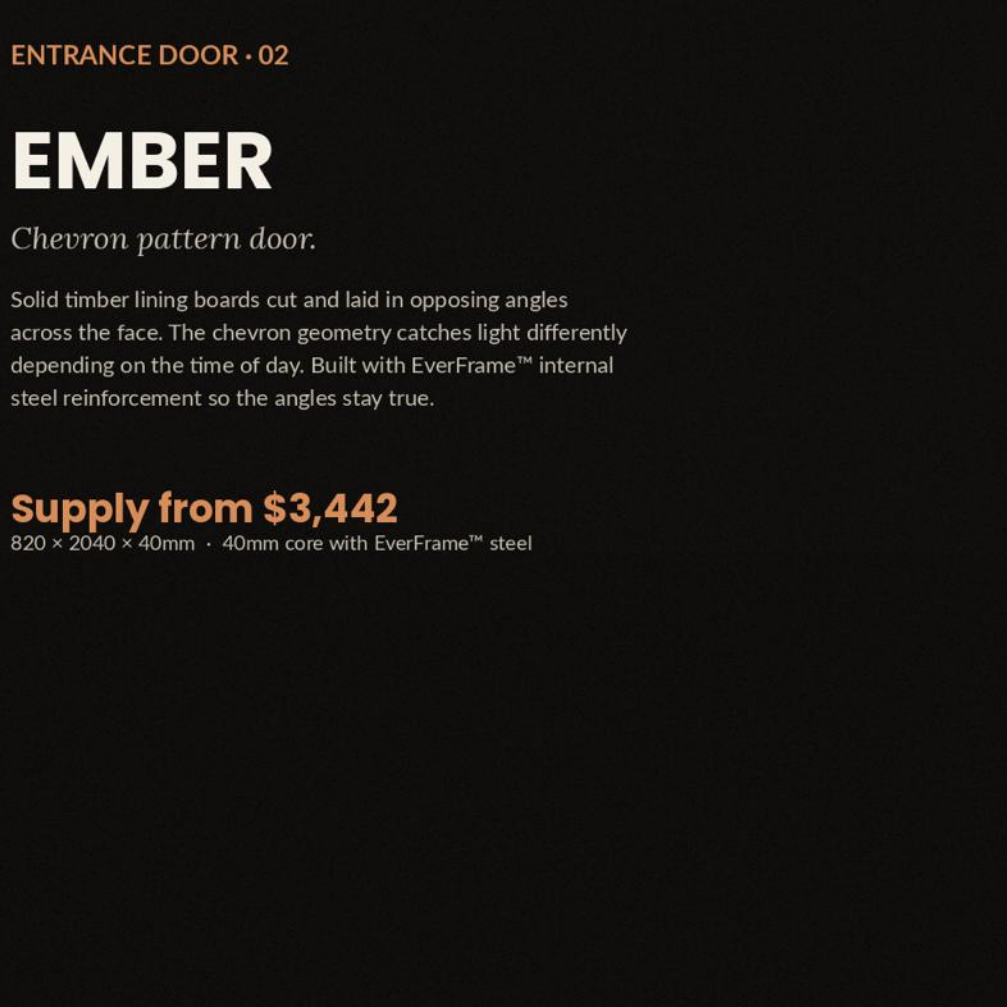

ENTRANCE DOOR · 01

## NORTH

Vertical lining board door.

Full-length timber lining boards running vertically across a 40mm solid core. No joins, no finger joints. Each board runs the full height of the door in a single piece – that's what gives NORTH its clean read from the street.

**Supply from \$2,292**  
820 × 2040 × 40mm · 40mm solid timber

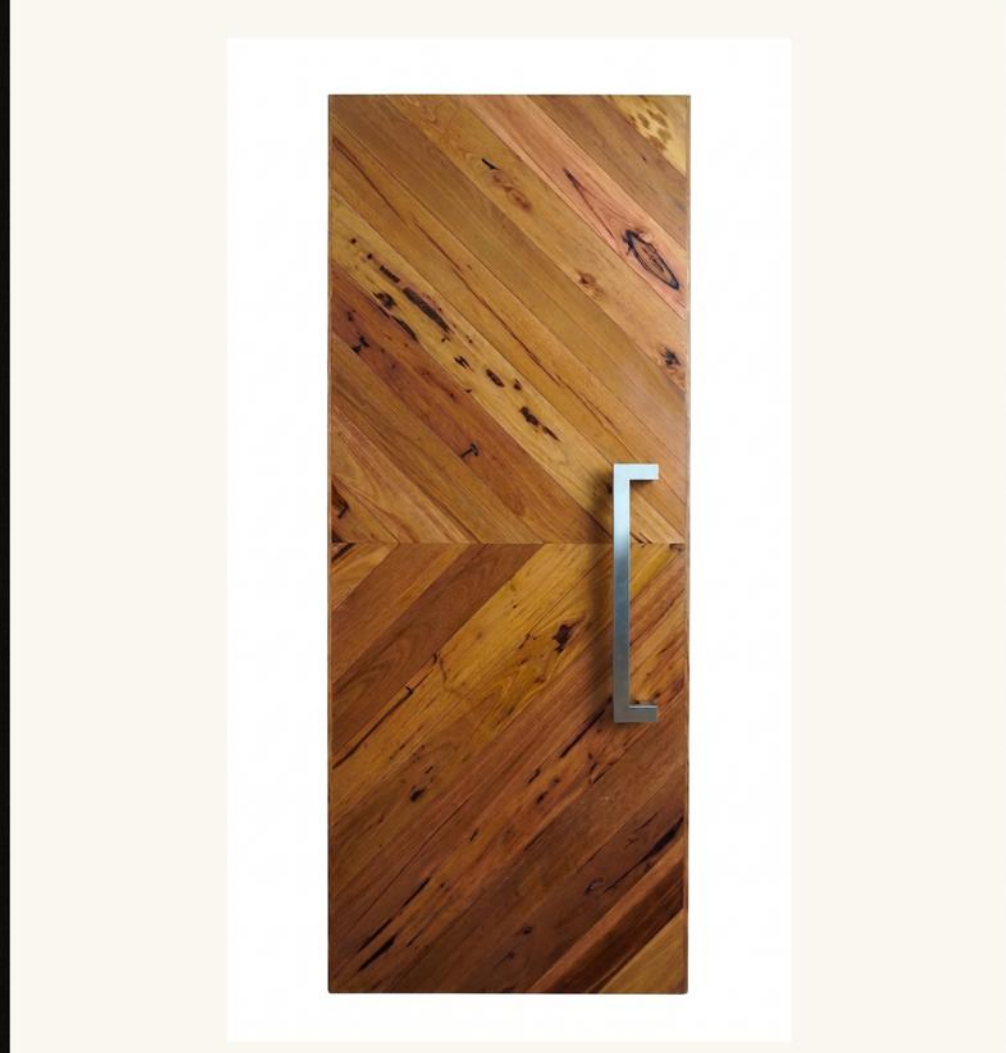

ENTRANCE DOOR · 02

## EMBER

Chevron pattern door.

Solid timber lining boards cut and laid in opposing angles across the face. The chevron geometry catches light differently depending on the time of day. Built with EverFrame™ internal steel reinforcement so the angles stay true.

**Supply from \$3,442**  
820 × 2040 × 40mm · 40mm core with EverFrame™ steel

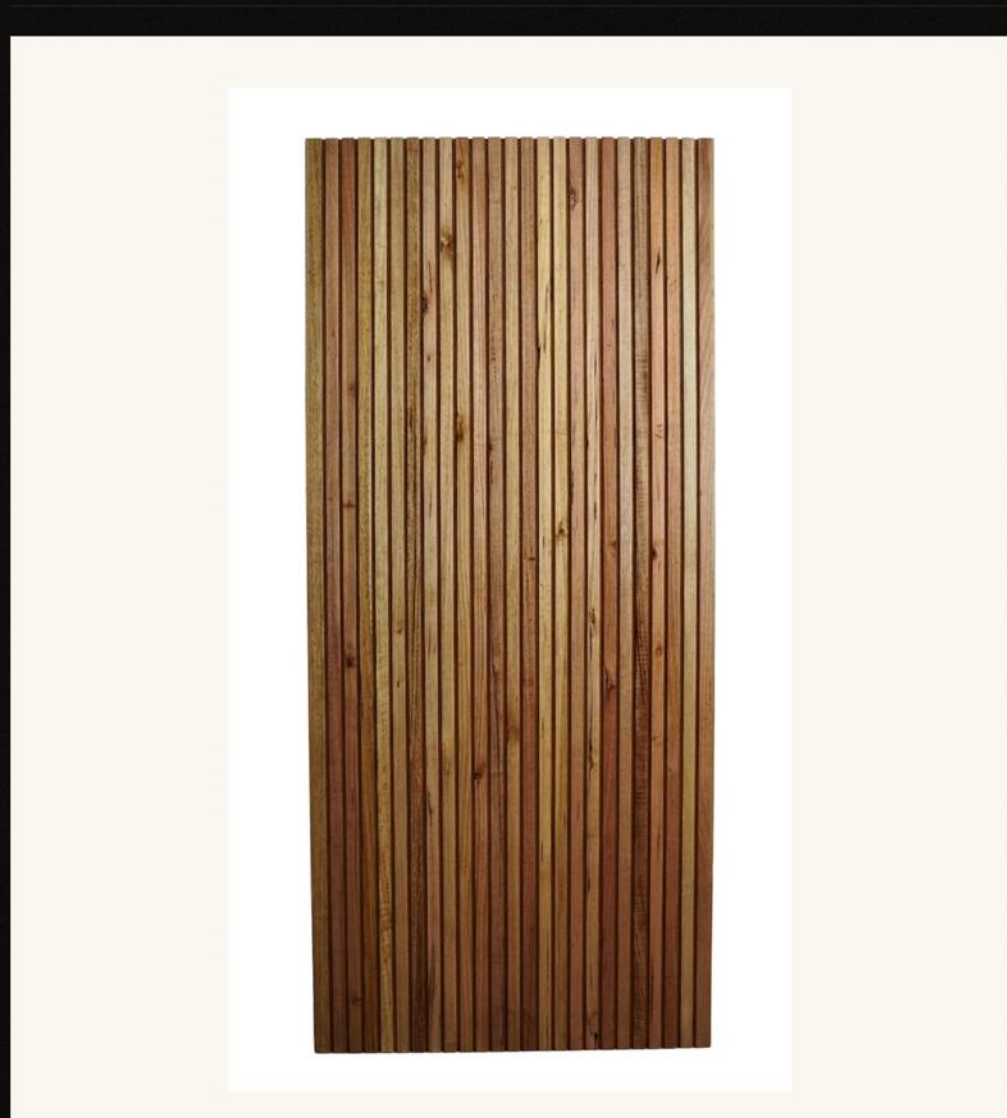

ENTRANCE DOOR · 03

## EVEN

Batten overlay door.

Solid timber battens applied at consistent spacing across a 40mm core. The gaps between battens cast shadow lines that shift throughout the day – the same door looks noticeably different at 8am and 4pm. The most contemporary in the range.

**Supply from \$2,480**  
820 × 2040 × 40mm · 40mm core with batten overlay

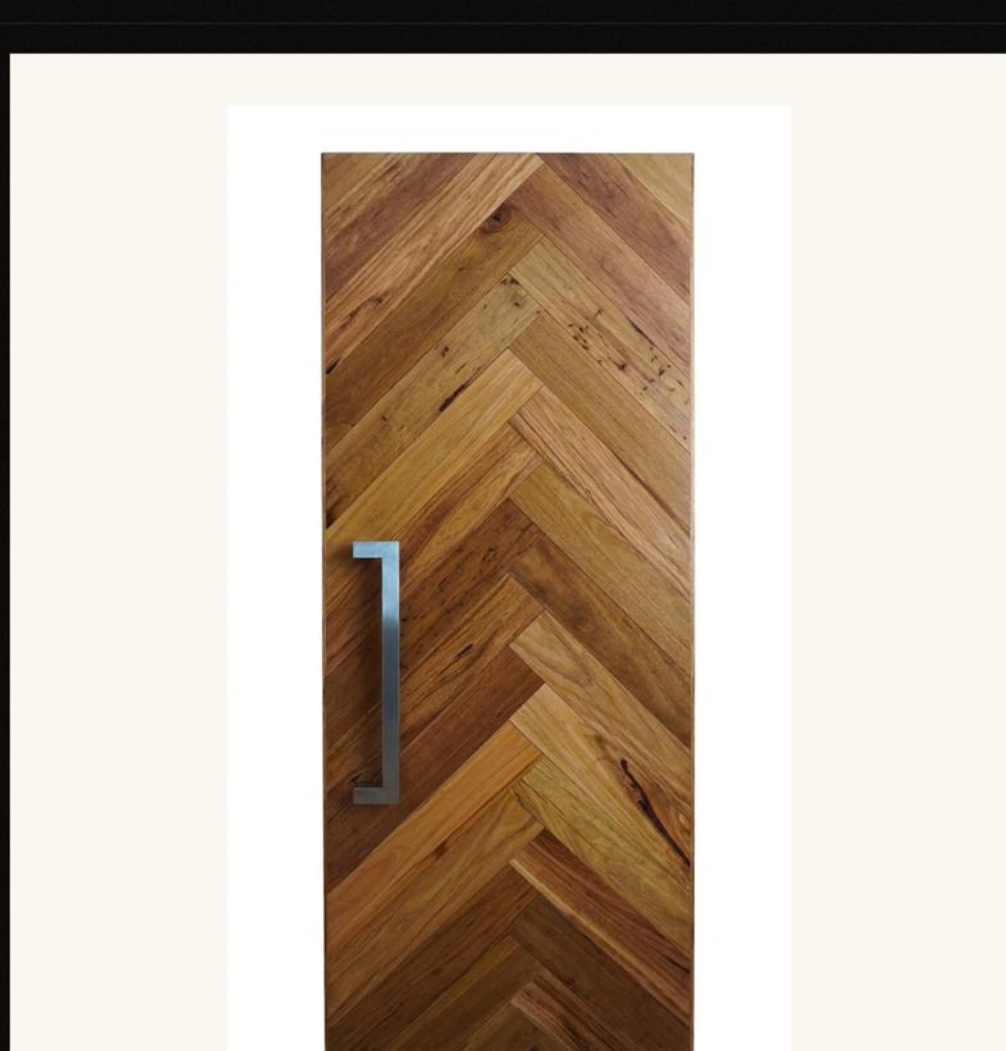

ENTRANCE DOOR · 04

## BONE

Herringbone pattern door.

Herringbone pattern built from solid timber lining boards, each piece cut and laid by hand at opposing angles. Quiet rhythm, refined detail. Built with EverFrame™ internal steel reinforcement to hold the herringbone geometry true over time.

**Supply from \$3,242**  
820 × 2040 × 40mm · 40mm core with EverFrame™ steel

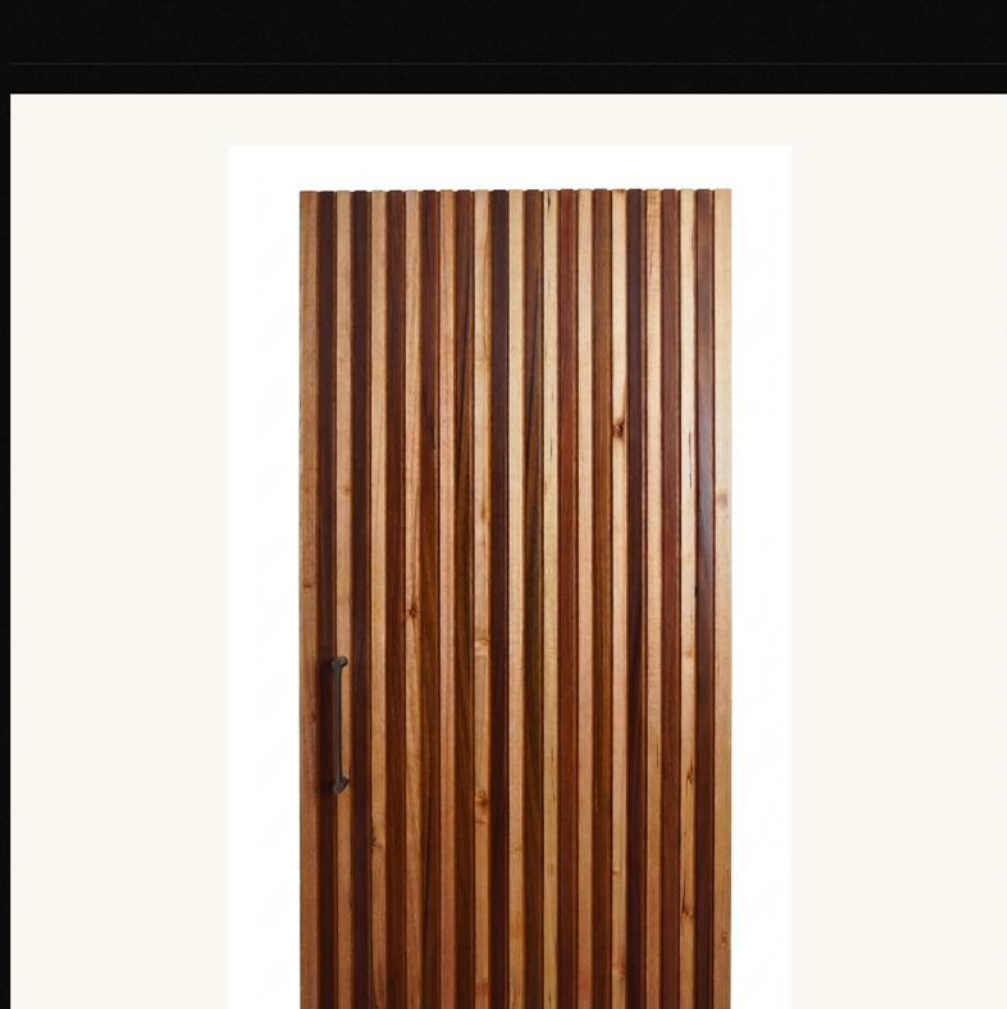

ENTRANCE DOOR · 05

## WEAVE

Mixed species batten door.

Two timber species alternating across the face in a batten overlay. The contrast creates depth and texture that changes as the light moves. Pick any two from the range. Every Weave is a one-off – no two species pairings look the same.

**Supply from \$2,830**  
820 × 2040 × 40mm · 40mm core, two-species battens

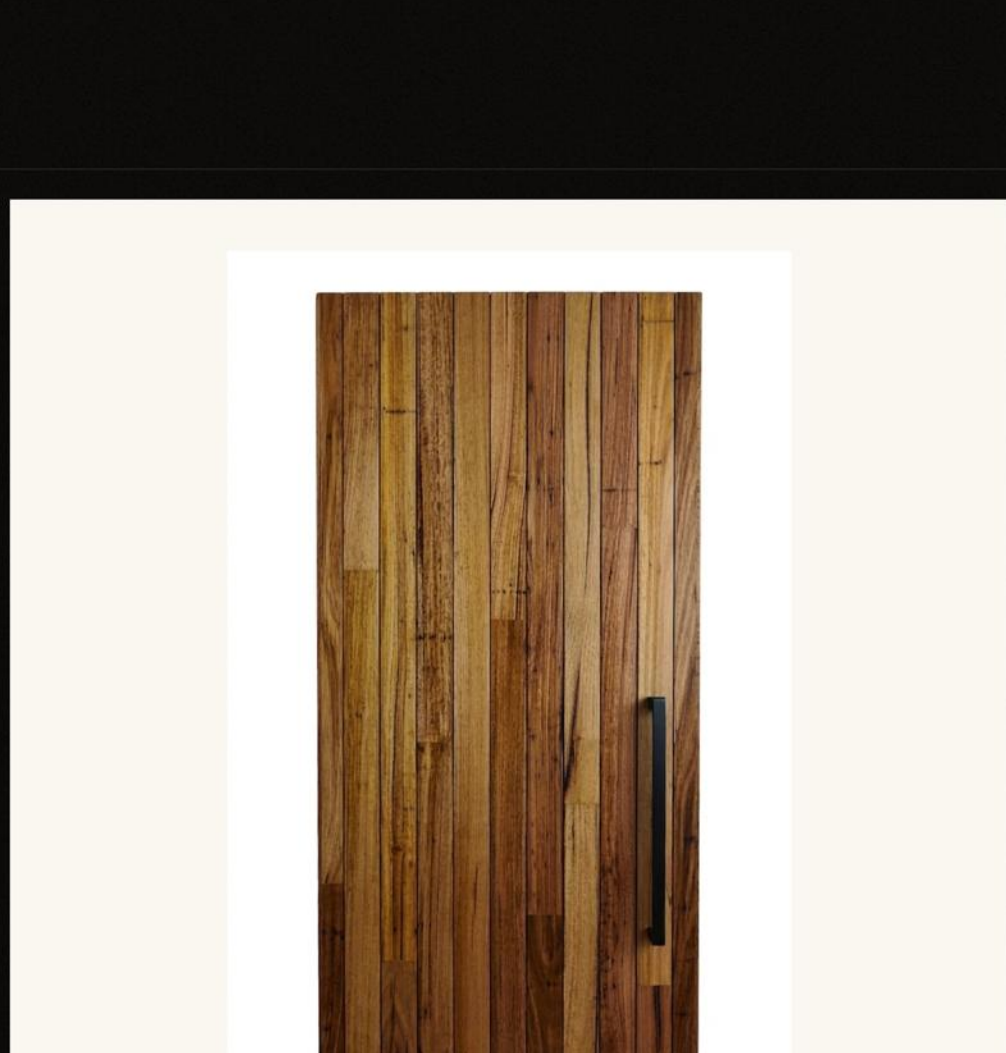

ENTRANCE DOOR · 06

## HAZE

Refined lining board door.

The entry point into the architectural range. Shorter timber lengths joined precisely above and below eye level – the joins disappear once the door is hung and finished. Same construction, same workshop, same timber species as every door in the range.

**Supply from \$1,948**  
820 × 2040 × 40mm · 40mm solid timber

ENTRANCE DOOR · 07

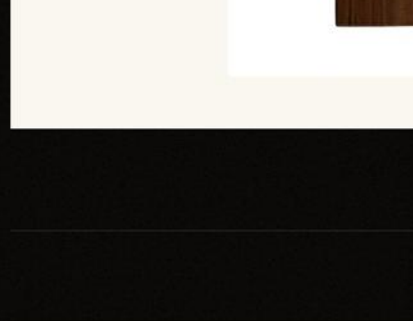

## NORTH WITH HALO

A vertical vision panel for the architectural range.

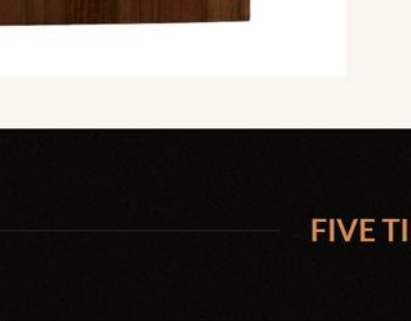

HALO is a full-height glazed panel that sits flush alongside the door leaf. Brings natural light into the entrance without compromising the architectural surface across the rest of the door. Available on every door in the range, in clear or frosted glass.

**Supply from \$2,792**  
820 × 2040 × 40mm · Door + sized HALO panel
