

PIVOT & OVERSIZED

Most installers *won't touch pivot.*

A pivot door swings about a centre point, not a side — and that one change rewrites the whole install. Structural reframing, hardware tolerance, perimeter sealing all become precise engineering. Most Melbourne installers can't quote it at all. **Bespoke Doors manufactures them. Doors Replaced installs them.**

PILLAR · Thermory Ignite black-stained spruce · FritsJurgens pivot

Supplied & installed from \$10,000

Door unit from \$5,000. A complete pivot entrance bundles the door, integrated jamb in matching timber, EverFrame™ steel reinforcement, FritsJurgens hardware, structural reframe and install.

THREE SIGNATURE DESIGNS

BESPOKE PIVOT · 01

PILLAR

Thermally-modified spruce · deep charcoal-black

Built from Thermory Ignite 5 spruce, treated to take a deep black stain without warping or cupping. The shou sugi ban look — full-depth charcoal grain — with no flaking, no soot, no maintenance. Jamb, mullions and header clad to match, full-height brass bar handle.

on application

BESPOKE PIVOT · 02

CIRQUE

Porta Contours · first pivot of its kind in Australia

The Porta Contours profile used as cladding on walls and joinery — now carried across the entrance, so the timber language doesn't stop at the frame. Bespoke Doors is the first in Australia to build a full pivot from it. Tasmanian Oak, Clear Pine or Primed FJ Pine; every profile on request.

BESPOKE PIVOT · 03

ISTHMUS

Porta narrow linear · depth and shadow

Built from Porta lining board in a narrow, linear profile — narrower boards, deeper rebates, finer joinery. The whole door reads as a run of vertical lines. The quiet door in the range: refined rather than declarative, made for considered architecture. 60-80mm, 8-12 weeks.

DOOR UNIT FROM
\$5,500

Individually engineered & quoted

Every pivot runs on FritsJurgens hardware.

System M+ — heavy-duty oversized pivots rated to 250kg, magnetic catch on close (our 4m Glen Waverley and South Yarra pair). **System One** — residential, rated to 100kg, quieter and lighter. Both are mounted live in the Moorabbin showroom — the only Melbourne crew where you can swing both systems before you commit.

NORTH · HAZE · EMBER · BONE · EVEN · WEAVE

Any architectural design, built as a pivot — same workshop, same timber options, FritsJurgens hardware. Plus custom one-off pivots built to brief.

Can't see it here? *We'll build it.*

What's in this brochure is just what we make most often. Our workshop at **Bespoke Doors** manufactures custom doors to order — whatever you've seen, sketched, or can picture in the opening. Send a photo, a drawing, or just the idea, and we'll take it from there.

CUSTOM-BUILT BY BESPOKE DOORS · SUPPLIED & INSTALLED BY DOORS REPLACED

A great pivot door, installed badly, is a \$20,000 problem.

01

Structural reframe

A pivot rotates around a single point, so the opening has to carry centre-pivot load — often with steel reinforcement to the lintel. Reframed correctly, or the door reads bad forever.

02

FritsJurgens tolerance

Sub-millimetre alignment between top and bottom pivots. Out of spec by 1mm and the door won't close right. We mount both points before the door is ever hung.

03

Perimeter sealing

No hinge stop means the full four-edge seal has to be specified without that anchor — usually a custom seal for the pivot leaf. The detail most installers miss.

South Yarra · American Oak pair, System M+

Balwyn · Custom cedar, full perimeter seal

Aspendale · Vertical batten, System One

Glen Waverley · 4m oversized, structural reframe

SWING IT BEFORE YOU COMMIT.

Both FritsJurgens systems mounted live — feel the weight, hear the close.

7 Nelson Street, Moorabbin · Saturday 9-3 walk-in · Wed-Fri 9-3 by appointment

Pivots manufactured by Bespoke Doors at 7 Nelson Street, Moorabbin · FritsJurgens hardware mounted live in the showroom.
Supplied and installed by Doors Replaced — their preferred install partner · Free measure across Melbourne metro.
