

ENGINEERED FOR EXPOSURE

The end of the *disposable door cycle.*

Built with the protection inside, not painted on top.

From \$2,200 supplied & installed

Colorbond® steel both faces · RotGuard™ moisture-resistant edges · engineered weather-resistant core · standard 820 × 2040, or made to your opening.

Real Install · StormBloc in Surfist · Armadale

THREE CONFIGURATIONS

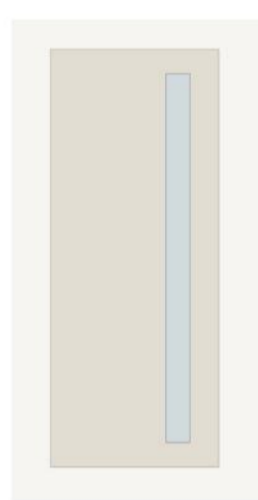

CORE

Solid Colorbond panel

Maximum privacy and weather resistance. *Best for laundry, garage, side and rear doors.*

FROM

\$2,200

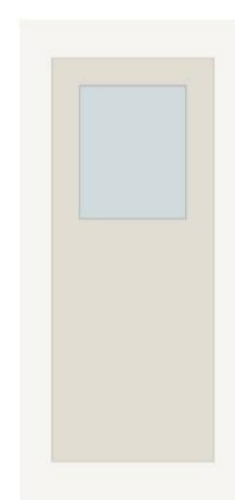

VISION

Small viewing window

Light and a line of sight without opening the door. *Best for front and rear doors needing visibility.*

FROM

\$2,700

HALF LIGHT

Half-height glazing

Brings natural light into hallways and entries. *Best for front doors where light matters.*

FROM

\$2,700

Extreme edge capping

Reinforced metal capping wrapped over all four edges for the toughest exposure. Available on Core, Vision and Half Light.

+\$300

22 COLORBOND® COLOURS · ALL ONE PRICE

Colorbond® steel Classic range. Colours are indicative only — reproduction limits of print and screen mean they won't exactly match the steel. Ask for a sample chip.

REAL INSTALLS · COMPLETED ACROSS MELBOURNE

Monument · Chadstone

Shale Grey · Half Light · Chadstone

Surfmist · Clayton

Most external doors die the *same way.*

Paint fails, moisture wicks up the bottom edge, the timber swells and rots. StormBloc puts the protection **inside** the door — Colorbond steel both faces, RotGuard™ moisture-resistant edges, an engineered weather-resistant core. Factory finished, so it never needs repainting.

Manufactured by Bespoke Doors, supplied and installed by Doors Replaced.
